Hello Michael,

I have no further comments for this Modification. You may proceed with these activities. The EPA reserves the right to request additional information or actions if conditions or information should change.

Mike

Hello Michael,

This mod looks fine to me, but I think you should mention something about: "if soil conditions show indication of staining or areas of question, that these will be addressed separately." Something to that affect.

Mike

Subject: RE: CFAC SAP Modification #6

Mike,

After speaking with the drillers and the team, we are proposing to complete the borrow pit soil sampling from test pits completed with an excavator. We have revised Modification #6 to reflect the changes to our approach.

We would like to do this work while Cascade still has people onsite this week if you concur with our approach.

Please let us know.

Mike,

I just gave you a call but Paula mentioned you were out of the office today. I wanted to let you know that we walked the borrow pit area with Cascade and the sonic rig will not be able to perform the borrow pit borings. The area is too steep and uneven to be able to mobilize the rig to the area.

We are currently evaluating other options and we'll let you know what we decide next week. Thank you.

Hello Mike,

As discussed, please see the attached modification #6 and associated attachments that summarize the proposed added borings in the borrow pit area. Please let me know if you have any questions.
